SECURE FREIGHT INSIGHTS Q3 2026 FOR SHIPPERS

TQL

TQL'S KEY TAKEAWAYS

Freight at Rest is Freight at Risk

Holidays are approaching. The best ways to avoid loads being left unattended are to schedule direct transit times, utilize team drivers, and use tracking devices that alert when a shipment is not moving.

Redirected Shipments

Bad actors are impersonating brokers and shippers, instructing drivers to deliver to unauthorized locations. Mitigate this risk by advising drivers to only deliver to the address on the BOL.

Shipper's Interest Insurance

With cargo theft on the rise, Shipper's Interest insurance provides full-value cargo coverage and faster claims handling on a per-shipment basis. Some exclusions apply depending on policy terms. Contact your Logistics Account Executive to learn more.

Q3-26 INDUSTRY IMPACT[1]

547
INDUSTRYWIDE INCIDENTS
-32.97% Decrease YoY ↓

$230.09M
INDUSTRYWIDE LOSS
105.66% Increase YoY ↑

REASON FOR IMPACT

- **Evolution of Tactics:** Criminals are exploiting compromised carrier accounts, phone systems and emails to impersonate trusted contacts and redirect shipments, even after pickup.
- **Targeted Commodities:** High-value data center equipment, including servers, networking hardware and copper, remains an attractive target for cargo theft due to growing demand and resale value.
