

SECURE FREIGHT INSIGHTS Q2 2026 FOR CARRIERS

TQL'S KEY TAKEAWAYS

Protect Your Logins

Scammers may try to steal your usernames and passwords. They can use your information to steal shipments in your name. Change your passwords often. Do not click on links you do not trust. Check your accounts for strange activity. Use multi-factor authentication when you can.

Protect Your Money

TQL does not charge carriers to access shipments. All shipments are offered directly by TQL employees. TQL does not use agents or outside companies to offer shipments.

Protect Your Cargo

A few simple steps can help prevent cargo theft. Do not leave shipments alone. Always lock your tractor. Use GPS tracking so you know where your truck and cargo are.

Protect Your Route

If someone asks you to change your route while the shipment is moving, call the person who gave you the shipment to make sure the request is real. Scammers may pretend to be brokers or shippers and try to send your cargo somewhere else.
